

Jr. Software Application Developer

Location: Markham, Ontario

Date Posted: June 6, 2011 (expires June 27, 2011)

Job Description:

Delta 360 Inc. is searching for a **Jr. Software Developer** to build leading edge financial solutions for the lending market. In this role, you will drive the design and construction of complex business requirements provided by the product management team into innovative technology solutions. This role will involve a blend of responsibilities, all requiring a hands-on approach resulting in the production of software that is of the highest possible quality and maintaining our reputation of ease-of-use, performance and reliability.

- Responsibilities:**
- Application development using Jade Object Oriented toolset
 - Development of reports using Crystal Reports
 - Deliver tested systems to QA, and work with QA to ensure that the overall solution meets Delta 360's, and the client's, quality expectations
 - Take ownership for the technical integrity of the solution
 - Contribute actively to internal initiatives aimed at continuous improvement of Delta 360 processes and policies

- Skills and Experience:**
- BS in Computer Science, Computer Engineering, Electrical Engineering or equivalent experience
 - Knowledge of OO analysis and design (no Jade experience required)
 - Knowledge of use case, class diagram, UML, sequence diagrams
 - Ability to take use cases and code solutions
 - Understanding of Web Services and XML
 - Practical experience with .Net, Java or other OO based development tools
 - Experience in the analysis, design, development, and application deployment of large scale enterprise application systems, would be an asset
 - Experience writing reports with Business Objects / Crystal Reports or similar tools, would be an asset

- Personal Attributes:**
- Proven methodical thinking and problem solving skills. Pragmatic when needed
 - Possess a unique combination of creative and analytical talents
 - Excellent attention to detail, balanced with the ability to make quick decisions
 - Great attitude and commitment to excellence
 - Open and adaptable, looking for a real challenge and totally passionate about the role; determined to become an expert in our domain
 - Self-starter, energetic and the drive to thrive in a start-up working environment
 - Flexibility to be responsive to client and internal needs; travel to client sites at short notice; get the job done

- Compensation:**
- \$TBD, based on experience
 - 5-10% Performance Based Annual Bonus
 - Comprehensive Benefits Plan
